

## CAMFIL SERVICE IN SEMICONDUCTOR INDUSTRIES

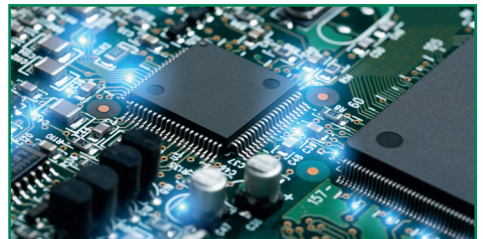

---

### Your challenge:

Protection of the processes, protection against dust, fine dust and exhaust gases

### Our solution:

- We work according to DIN EN ISO 14644-3, VDI 2083-3, VDI 6022
- Replacement of Hepa/Ulpa, compact and pocket filters
- Filter change in FFU's
- Qualification / requalification of the filters
- Volume flow measurements and flow visualization
- Construction & conversion of filter walls
- Air germ measurements, microbiological investigations (Assessment by an independent institute)
- SEM analysis
- Creation of standard-compliant documentation

---
