

## AirImage-COR

Visualize Corrosive Gases Before Damage Becomes Irreversible

Corrosion is typically not recognized until it's too late, resulting in damage that could have been prevented. Camfil's AirImage-COR corrosion control monitor instantly measures corrosive gases in the air to indicate when air filters need changing to keep sensitive electronic equipment protected and valuable assets preserved.

Preserve Valuable Assets and Protect Sensitive Equipment

### Why AirImage-COR?

- Instant corrosion readings at your fingertips
- Most accurate sensors engineered for real-time corrosion monitoring
- Full suite of connectivity options to Building Management System
- Customizable notifications by email and SMS
- Manage device remotely with the Progressive Web Application (PWA)
