SOMETIMES YOU NEED TO GO WAY BACK TO BE MODERN

AIR PURIFIER CITY RANGE

Allergy-friendly Quality Tested

ECARF

www.ecarf-label.org
European Centre for Allergy Research Foundation
Imagine if your office air was as clean as the air many thousands of years ago. Free of today’s bacteria, viruses and harmful particles. Luckily, you can do more than just imagine this.

With Camfil’s CITY range air purifiers – especially designed for offices, schools, hospitals, public buildings etc – you can experience that good old clean air in no time.

**FACTS:**
In a matter of hours (depending on the size of the room), a CITY air purifier with three-stage filtration will reduce the number of particles in the air by literally millions per cubic metre.

The HEPA filter used is so efficient that air would have to pass through an average ventilation system three times to achieve the same level of purification.

Imagine if your office air was as clean as the air many thousands of years ago. Free of today’s bacteria, viruses and harmful particles. Luckily, you can do more than just imagine this.

With Camfil’s CITY range air purifiers – especially designed for offices, schools, hospitals, public buildings etc – you can experience that good old clean air in no time.
We are glad you asked. The answer is simple: Our CITY range air purifiers are a supplement to your existing ventilation system and will take care of air pollutants generated both from the outside as well as from inside your premises. Many of the harmful particles of today’s world are common indoor air pollutants like formaldehyde, fungi and various VOC:s (Volatile Organic Compounds). An unpleasant truth is that indoor air can sometimes be even more polluted than the air on an average city street.

**FACTS:**
Many of the pollutants common in the air today, were not present thousands of years ago – for example emissions from furniture, wall paint, cosmetics, air fresheners, cleansers, carpets, aerosol propellants, pens and markers, building material, waxes and polishes, plasticizers etc.
When you let our air purifiers take care of harmful particles, odours and in some cases gases, the improved air quality will provide a much healthier work environment. We are all sensitive to these particles, some of us more than others, so the benefits may vary from fewer sick leave days to increased well-being at work.

Your employees will have more energy to be productive when you reduce common “bad air” symptoms like headache, coughing, allergic reaction, respiratory problems, eye irritation, nausea, and skin rashes etc.

CITY air purifier is a allergy-friendly product suitable for people with allergies and intolerances. It has been awarded ECARF (European Centre for Allergy Research Foundation) certification for its ability to significantly reduce the level of pollen, bacteria and mold spores in the air.
ARE THERE REALLY 14 TIMES AS MANY REASONS TO CHOOSE AN AIR PURIFIER FROM CAMFIL?

Yes.

You may not be able to see what separates a CITY air purifier from other air purifiers with the naked eye. But since we are the world leader in clean air solutions with more than 50 years experience, you can be sure that the filter-package inside is the best one available.

For example, a comparison with another brand’s product showed that our filter-package is 14 times heavier than theirs. This means that we offer a much higher capacity to retain dust and particles without compromising on the ability to let the air pass through the filter. You could say it is like comparing the load handling capability of a normal size car to a full size truck.

FACTS:
The larger the surface of an air filter, the more particles it can hold. It also means that the ability to let air through, without the filter getting clogged up, will be maintained for a longer period of time – and less energy will be consumed.

FACTS:
By choosing CITY range air purifier, you get a filter package that will deliver consistent performance and a high level of efficiency throughout its lifetime. It will also be more sustainable and greener than most other solutions.

Clean air – free of particles and harmful pollutants, gases or odours – is dispersed in all directions, 360°.

The polluted air passes through this pattern of holes on both sides and continues inside to be purified.

Removable top for easy filter replacement.

Display. For setting the desired airflow. Here you can also see when it is time to replace the filters.

Clean air solutions - Camfil – Clean Air Solutions
**HOW IT WORKS.**

The polluted air passes through the pattern of holes on both sides and continues inside to be purified.

**CLEAN AIR IN ALL DIRECTIONS**

City M air purifier is equipped with a highly efficient HEPA filter. It removes 99.95% of all particles down to the size MPPS (most penetrating particle size) according to EN1822 standard.

The molecular filter efficiently eliminates odours and gases.

Clean air – free of particles and harmful pollutants, gases or odours – is dispersed in all directions, 360°.

**QUICK AND SIMPLE FILTER CHANGES**

To change the filters only takes a minute.

- Remove the top lid and the lid underneath.
- Take out the used filters and replace them with new ones.
- And put the lids back in place.
- Also, remember to turn the machine off during this procedure.

Camfil – a global leader in air filters and clean air solutions.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment.

We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That’s why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control and a strong customer focus we aim to conserve more, use less and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 30 manufacturing sites, six R&D centers, local sales offices in 30 countries, and about 4,800 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes and the environment, visit us at www.camfil.com.
