

ADVANTAGES

- Optimised filter life
- Energy efficient operation and cleaning
- Short delivery times
- Various flanges and filter types available
- Direct fit replacement
- Cellulose & Synthetic media options

Application	Depending on the filter media and its properties, Camfil ´s round retrofit filter cartridges can be used on a broad spectrum of applications across different industries.
Installation Options	Direct fit replacement: Due to the wide selection of different models and flanges, for example DIN_Round, Twistlock, Uniclean, Threaded, Jet3 & Jet4, our range of round retrofit filter cartridges perfectly fit into all common dust extraction systems such as: Donaldson, Keller Lufttechnik, AAF, Nederman, Kemper, Plymovent, Dustcheck, ESTA, Kappa, WAM, Mahle and more.
Comment	Camfil ´s retrofit filter cartridges are available with two different types for filter media, cellulose/paper and spunbond/synthetic. The media can be treated or layered with coatings to provide best separation efficiency on various industrial applications.  All medias are tested to meet the European Standard for Dust Filters, EN60335-2-69 Dust Class M.
