

Advantages

- Low pressure drop
- Easy mounting
- Heavy duty construction
- Large filter area
- 100% incinerable
- Aerodynamic construction

Application:For dry areas, where high humidity and hygroscopic dust are less occurring

Type:V-Bank Filter

Frame:Plastic moulded

Media:Glass fiber

Rec. final pressure drop acc. EN 13053:450 Pa

Temperature max:70°C

Header frame: GT 25mm, GTX 20mm.

The Opakfil GT is a cost effective solution for areas with dry environments where considerations hygroscopic dust are less important. Its unique geometry provides greater inlet area than any other V-shaped filter, resulting in a much lower pressure drop.

* ME%: Minimum efficiency ref. to EN779:2012

Two versions available; 1) Standard - with two nets on down stream side and 2) Premium - with eight nets on down stream side
